

# HOW TO CREATE MOVING DAY CHECKLIST

## STEP

# 1

### Craft a well-organized list with several columns

Develop an organized list with several columns. You can use a physical sheet of paper or a computer, whichever suits your preference. Including at least three columns in your list is crucial: the item's name, current condition, and corresponding value.

## STEP

# 2

### Capture images of each room

Take pictures of each room, focusing on the pieces you plan to transport to your new address. It's a good idea to have visual records of your furniture in all the rooms of your home.

## STEP

# 3

### Declutter and organize everything

A move gives you a perfect opportunity to declutter your current home. This is your chance to delve into all your possessions and remove the things that no longer serve you.

## STEP

# 4

### Decide which items are essential for transport

The items most important to you should be at the top of the list. Additionally, you can incorporate a column to provide specifics about the condition of each item.

## STEP

# 5

### Use printable labels and different color markers

Now it's time to get creative and splash some color on your moving boxes. You can mark what's already packed and what's up next to go onto the moving truck. It's like gently reminding yourself of what's next on your to-do list!

## STEP

# 6

### Take a final walk-through

Take a final walk-through and check if all the items you plan to relocate are on the list. Visit all the rooms once again and follow your list rigorously. Make sure you cover every nook and cranny by visiting each room.
